

ECOFLOW SUCCESS AT

Four Seasons Hotel

FOUR SEASONS
Hotels and Resorts

Location

San Francisco, Financial District

Highlights

- 275+ guestrooms and 136 residences
- 3 large kitchens (2 restaurants)
- Sports Club/LA Center with café (127,000 sq ft)

Problem

The Four Seasons hotel spent \$17,000 a year snaking their kitchen drain lines. In addition to snaking, they suffered from several drain backups, causing the kitchen to be shut down due to environmental reasons.

Ecoflow Solution

The Four Seasons hotel installed two BIO-Amp™ systems in the main kitchen and prep area.

Result

Installation of the BIO-Amps has resulted in zero kitchen down time and a significant savings of over \$5,000 a year. Since the install date, they have not experienced a single kitchen drain line problem.

Additionally, the Four Seasons has added four BIO-Amps to address other problems in The Seasons restaurant kitchen and the Sports Club LA Café.
