

ECOFLOW SUCCESS AT

Charleston County School District

Charleston >excellence is our standard
County SCHOOL DISTRICT

Location

Charleston, SC

Highlights

- 80 schools
- 45,000 students

Problem

In 2006 the Charleston County School District had several drain line backups at many of their schools. They had to jet their lines 5 to 6 times each year which was disruptive, costing them around \$2000 a year at several locations.

Ecoflow Solution

In 2006 Chemsearch FE installed 3 BIO-Amps™ for the school district to ease the need for frequent jetting.

Result

Since the installation, the school district has added 16 more BIO-Amps and 1 DrainCobra. The plumbing superintendent hasn't had to visit a school for drain problems since.
