

ECOFLOW SUCCESS AT

University of North Carolina - Rex Hospital

Location

Raleigh, NC

Highlights

- 665 bed acute care facility
- 35,000 inpatient admissions per year
- Largest hospital in North Carolina

Problem

In 2001 the hospital was having serious issues with backups in the kitchen areas with foul odors and a fruit fly problem, causing patients and staff to become unhappy and complain.

Ecoflow Solution

In 2001 the hospital added seven BIO-Amps™ and is treating with DrainTain™ drain sanitizer.

Result

Since the introduction of the BIO-Amp, REX has reduced pumping by 50%, saving close to \$9,000 per year in maintenance and labor costs. Foul odors and drain flies are no longer an issue for hospital staff and patients.
