

ECOFLOW SUCCESS AT

Ameristar Casino

AMERISTAR
CASINO ★ RESORT ★ SPA

Location

St. Louis, Missouri

Highlights

- 400+ rooms and 12 suites
- 7 restaurants & 3 nightclubs

Problem

The Ameristar Casino was having blockages and odor problems in their 5-5,000 gallon grease traps. For 8+ years they had been using a competitor's liquid product with limited results. Constant backups and complaints caused them to pump more frequently than required.

Ecoflow Solution

Chemsearch FE added 3 BIO-Amps™ leading into the facility main lines and to the grease traps.

Result

Within 60 days, the traps were free-flowing and the odors had been virtually eliminated. Since the installation, the Ameristar Casino has eliminated the use of the competitor's product, saving them over \$3,000 a year. They have also eliminated the need to waste time and energy on routine maintenance of the grease traps.
