

## ECOFLOW SUCCESS AT

# The Mirage Hotel and Casino

## Location

Las Vegas, Nevada

## Highlights

- 3044+ rooms
- 17 restaurants & 12 nightclubs and bars

## Problem

In 2010 the Mirage Hotel and Casino experienced monthly backups and odors from the drain lines in their high end restaurant, Kokomos. In order to keep the doors open and the customers happy, the restaurant had become accustomed to spending thousands of dollars a year in maintenance fees. Constant backups and complaints were costing them thousands of maintenance dollars a year.

## Ecoflow Solution

Chemsearch FE added 2 BIO-Amps™ in the restaurant kitchen feeding into the main drain line.

## Result

Within 3 weeks the odors had vanished and they have not had a backup at the restaurant since units were installed.

Since the install of the 2 BIO-Amps, The Mirage has eliminated all use of other drain maintenance products and has installed 8 more units in other problem areas.
